[LYN-921] – Notification Event – Course – Enrolled by Admin should trigger notification for API based enrollments .....	5
[LYN-931] – API – Create a User endpoint doesn't trigger the User creation email.....	6

# Improvements

## [LYN-932] - New Related User option for the Recipients of the Notification Event - Discussion Reply

In previous versions of the dialogEDU LMS, the Recipients for the Discussion Event - Discussion Reply would only include emails to the Teacher or ALL Students in the Courses. This release adds a *Related User Option* for the Recipient list so that **only** the owner of the original post AND the person replying to that post, will get notified.

The screenshot shows a 'New Notification' form with the following fields and values:

- Name: Discussion Replies
- Event: Discussion - Discussion reply
- Recipient(s): x Related User
- Courses: (empty)
- Subject: Someone just replied to your discussion post!
- Template: Generic Notification
- Body: Hello %first\_name!

**NOTE:** Users can always navigate to their Notifications Subscription settings to opt out of these notifications.

## [LYN-941] - Only an Account Admin must be able to deactivate other Account Admins

In previous versions of the dialogEDU LMS, a User Import function performed by a privileged User, could accidentally deactivate the Account Administrators for the account. This has now been fixed. Only an Account Administrator can deactivate other Account Administrators within the account.

## [LYN-943] – Account Owner can be de-activated via User Imports

In previous versions of the dialogEDU LMS, a User Import function performed by a privileged User, could accidentally deactivate the Owner for the account. This has now been fixed. The Account Owner can never be de-activated.

## [SPRIN-363] - Accredited Providers custom attribute validations

New to this release is the addition of User custom attribute validations, before creating/updating a provider. The new validations ensure that the following custom attributes exist in the User Profile in order for the integration to successfully work.

CPE Monitor: ePID, accredited type

PharmaSuisse: FPH\_Number

### [SPRIN-370] [SPRIN-372] [SPRIN-373] - Export Successful submissions in the past 60 days for Accredited Provider as CSV

Also new to this release is a menu option to be able to export to a CSV, a list of ALL successful activity submissions to CPE Monitor in the past 60 days that are associated with the Accredited Provider number. The menu option is labelled *Export Successes*. The columns included in the CSV are:

Name, Email, Course, UAN, ePID, Birth Day, Participant Type, Participation Date

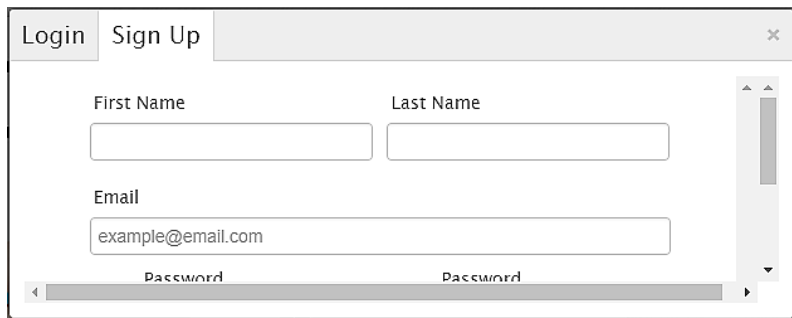

1	Name	Email	Course	UAN	ePID	Birth Day	Participant Type	Participation Date
2	Suzy Welliver Kach	skach@dialogedu.com	Aseptic Technique: Gowning	9876-38465-049489	301346	116	N/A	3/14/2014

# Bug fixes

## [LYN-918] - The Site level Signup form is not usable as the input fields are arranged randomly

In previous versions of the dialogEDU LMS, the signup forms at the site level were unusable as the forms were not formatted properly.

This is now customizable via CSS.

## [LYN-926] - Course with a blank unit doesn't get enrollments to a "finished" status

In previous versions of the dialogEDU LMS, the course completion status was impacted when a blank Unit without any Learning Objects was present. Learners who achieved a 100% course progress indication for finishing all the course learning objects didn't get a "finished" status for their enrollment. This was true even if there were other units with learning objects available. This is now fixed.

Introduction to Healthcare Systems Enrollments -

Sections: All	NAME	STARTED ON	PROGRESS	GRADE	SECTION	TYPE	STATUS	ACTIONS
<input type="checkbox"/>	Dr. Ronnie Kramer rkramer@globalhealtheducation.com	31 Aug, 2013 - 01:34 PM	0% Progress	0.0% Grade	New Section	Student	open Status	<input type="checkbox"/>
<input type="checkbox"/>	Suzy Welliver Kach skach@dialogedu.com	14 May, 2018 - 10:15 AM	100% Progress	0.0% Grade	New Section	Student	open Status	<input type="checkbox"/>

## [LYN-921] – Notification Event – Course – Enrolled by Admin should trigger notification for API based enrollments

In previous versions of the dialogEDU LMS, when enrolling a student via the API, a notification for "enrolled by admin" never triggered, if such a notification was created and available in the platform.

This is now fixed.

### [LYN-931] – API – Create a User endpoint doesn't trigger the User creation email

In previous versions of the dialogEDU LMS, for the API endpoint POST /v1/users, passing the send\_email = true parameter did not trigger the User creation email.

This has now been fixed.
